

INDIA BEARINGS COMBINE

CORPORATE CAPABILITY PROFILE

Your Trusted Partner Since 1957

THE LEGACY OF MASTERY

Established in 1957, India Bearings Combine (IBC) has stood as a cornerstone of the industrial distribution landscape for over 65 years. Sourcing strategically from direct global channels across Japan, the USA, and Dubai, IBC powers mission-critical plant machinery nationwide.

REPEAT CLIENT %

INDUSTRIAL INFRASTRUCTURE

Our 2,000+ sq. ft. dual-level layout (Ground + Mezzanine floor) in Mumbai accommodates a deep stock profile, ensuring high-speed logistical turnaround times.

THE DISTRIBUTION METRIC

65+ Years of Trade Legacy → Direct Global Sourcing → 2,000+ Sq. Ft. Mumbai Central Stock
→ **1,000+ Satisfied National Enterprises** Powered Daily.

STRATEGIC PRODUCT LINES

We deliver verified, premium original rolling element solutions from world-leading engineering ecosystems:

NTN

TIMKEN

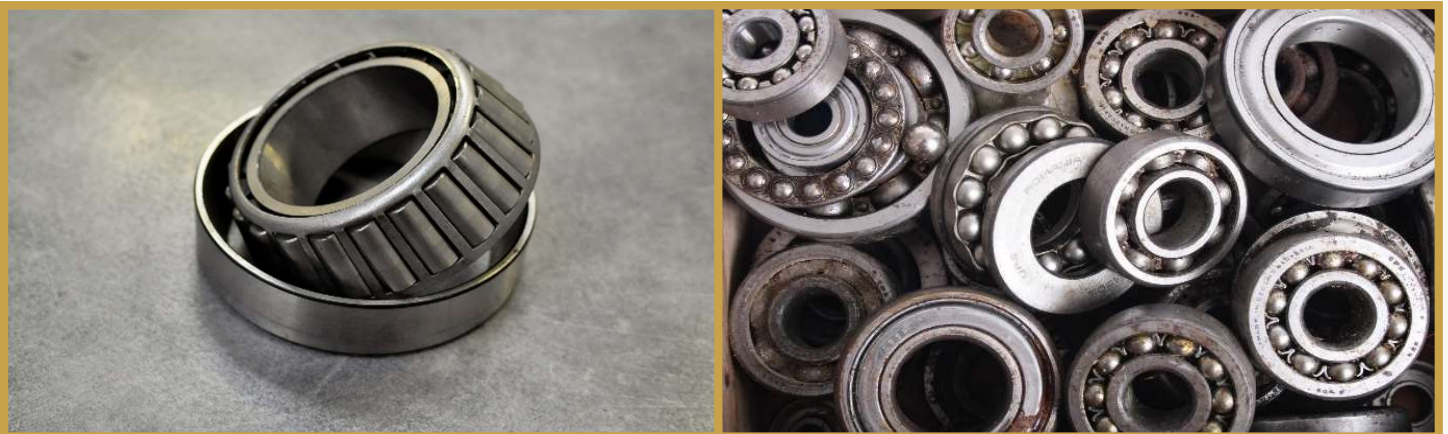

SKF

NSK

CORE SPECIALITY & TECHNICAL STRENGTH

NTN TAPERED & ROLLER BEARINGS

IBC Domain Mastery: High-Capacity NTN Tapered Roller Bearings. Designed with meticulously engineered conical rollers to establish flawless line contact. This architectural layout is built specifically to absorb punishing simultaneous heavy radial and axial thrust forces, proving why IBC is the undisputed market authority in heavy-duty rolling element distribution.

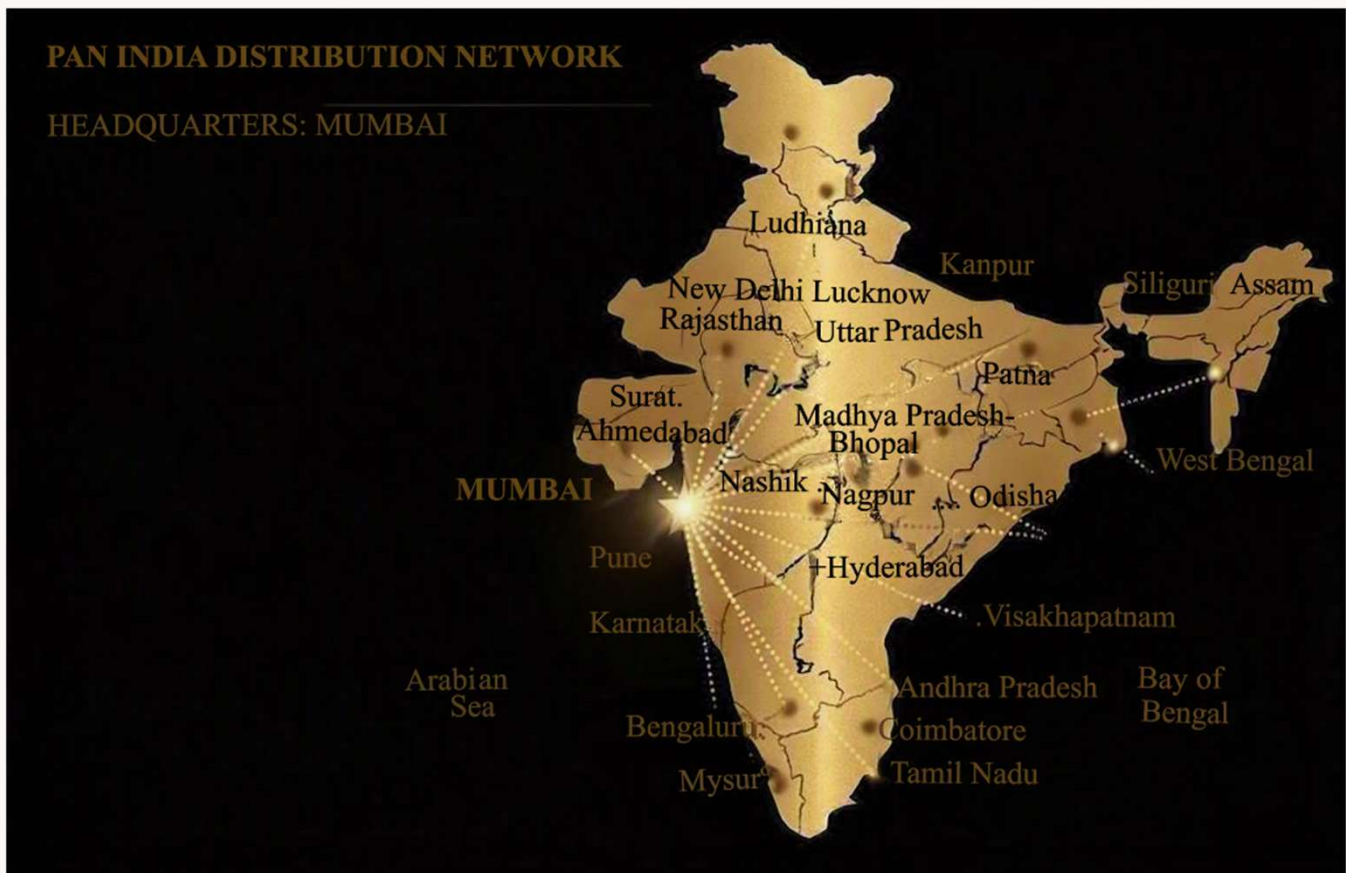

SUPER PRECISION SOLUTIONS

For complex manufacturing frameworks requiring tight geometric tolerances, we supply select high-rigidity NSK Super Precision (NSKTAC-D) ball screw support configurations, ensuring PN7 precision accuracy.

GEOGRAPHIC PRESENCE & DISTRIBUTION NETWORK

Company has a PAN India Distribution with Strong Presence in every zone. At India Bearings Combine, a bearing is only as good as its availability. Over more than six decades, we have engineered a sophisticated, resilient supply chain that bridges world-class international manufacturing hubs directly with India's core industrial sectors. Our network is built to eliminate lead times, mitigate supply chain disruptions, and guarantee that our clients maintain zero-downtime operations.

- 1 **Global Procurement Channels:** We don't rely on secondary domestic markets. IBC operates direct procurement pipelines from the world's most reliable engineering ecosystems to ensure 100% authenticity and access to rare components.
- 2 **The Mumbai Logistics Hub (The Hub-and-Spoke Core):** Our central operations are strategically stationed in the heart of Mumbai's industrial trading hub, serving as the master dispatch nucleus for nationwide fulfillment.
- 3 **PAN-India Delivery Execution:** Same-Day Dispatch Fleet in our region help us with immediate, on-demand dispatch to minimize sudden machinery breakdowns.
- 4 **Supply Chain Integrity & Zero-Counterfeit Guarantee:** In high-load environments like steel rolling mills or heavy-duty truck axles, a single counterfeit bearing can cause catastrophic system failure. Our distribution network features strict tracking from the port of entry straight to the client's plant floor. **Unbroken Chain of Custody:** Absolute protection against the aftermarket counterfeits that plague unorganized trade routes.

INDUSTRIAL VERTICALS SUPPORTED

Providing robust engineering elements matching severe mechanical duties across critical global industrial segments:

AUTOMOTIVE INFRASTRUCTURE

Engineered solutions for heavy-duty truck axles, passenger car wheel hubs, complex transmission architectures and gearbox machinery.

CONSTRUCTION & MINING

Heavy-duty designs built to survive abrasive, high-shock, and harsh environments for excavators and crushing mills.

METAL PRODUCTION & STEEL

High-rigidity structural bearings engineered for rolling mills operating under immense continuous pressures.

AGRICULTURE SECTOR

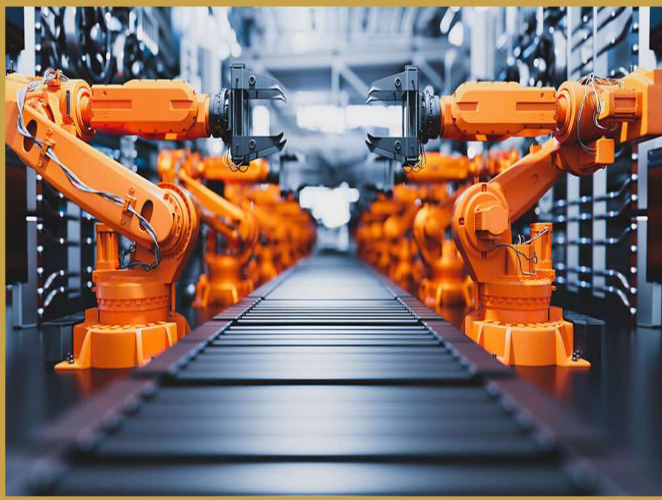

Highly sealed, low-maintenance bearing solutions for tractors and agricultural machinery.

INDUSTRIAL VERTICALS SUPPORTED (PART 2)

INDUSTRIAL MACHINERY & PRECISION EQUIPMENT

Standardized and custom configurations specialized for heavy hoisting, conveyors, and mechanical gearboxes.

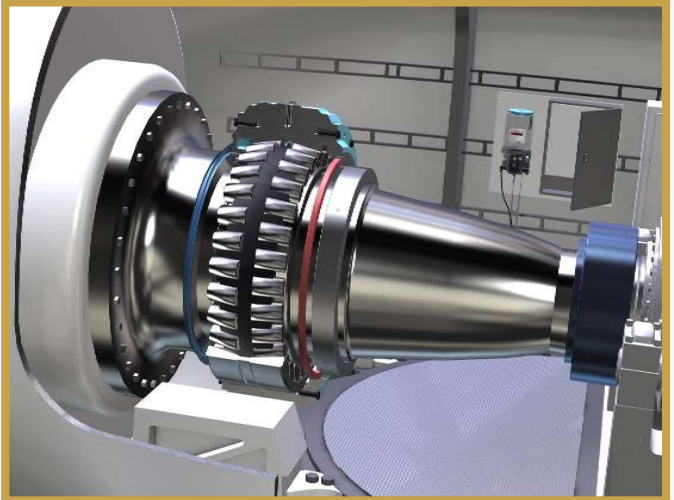

CNC & MACHINE TOOL PRODUCTION

High-accuracy sub-assemblies optimizing production tolerances, linear positioning, and mission-critical automated plant infrastructure.

RENEWABLE ENERGY

Critical mechanical components for precision wind turbine gearboxes, specialized aviation, and jet engine.

ROBOTICS & AEROSPACE

Highly specialized, precision-engineered components designed to operate under extreme conditions, including high speeds, significant temperature fluctuations, vacuum environments, and high-load capacities.

INDUSTRIAL VERTICALS SUPPORTED (PART 3)

TEXTILE ENGINEERING

High-performance bearing solutions for spinning, weaving, processing, and other high-speed textile machinery.

SHIP BUILDING AND MARINE

Reliable bearing solutions for propulsion, deck machinery, pumps, gearboxes, and critical marine applications.

CEMENT MANUFACTURING

Heavy-duty bearing solutions designed for crushers, mills, conveyors, and high-load cement plant machinery.

PRINTING

Precision-engineered bearing solutions for printing presses, rollers, cylinders, and high-speed paper-handling systems.

WHY CHOOSE INDIA BEARINGS COMBINE

AS YOUR BEARING SUPPLIER IN INDIA

While the Indian market offers numerous options for bearing procurement, **India Bearings Combine** sets the benchmark for quality and technical precision. We distinguish ourselves through a unique combination of extensive inventory and deep engineering expertise, making us the preferred choice for industries that cannot afford to compromise on performance.

1

AS YOUR PREFERRED BEARING SUPPLIER IN INDIA, WE ENSURE QUALITY AND TRUST

At India Bearings Combine, we only stock products from the most trusted and reputed manufacturers in the industry which is NTN, Timken, SKF and NSK. This ensures that you receive bearings that are of the best quality.

2

WE ARE INDIA'S #1 BEARING DEALERS WITH EXPERTISE & EXPERIENCE

With over 65 years of specialized experience, India Bearings Combine represents a multi-generational commitment to the Indian industrial landscape. This heritage is not just about time, it is about the technical mastery passed down through generations. Today, we back that expertise with one of the nation's largest inventories, featuring an unparalleled range of over 150,000 types of bearings from global leaders like NTN, Timken, SKF, and NSK. No matter the complexity of the challenge, our deep-rooted experience ensures we have the solution in stock.

3

BEST CUSTOMER SERVICE AS BEARING SUPPLIERS IN INDIA

We believe a great reputation is earned through the success of our clients. As a proven leader in the Indian bearing market, India Bearings Combine is the trusted partner for over 1,000+ satisfied customers nationwide. We go beyond the transaction by providing the technical guidance and dedicated support necessary to ensure you make the right choice for your specific application. Our expert team remains at your disposal, offering the insights and advice required to keep your machinery and your business moving forward.

"IBC has been a critical partner in ensuring our operational uptime with their technical expertise and ready stock."
